# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

|  |    |
|--|----|
| object   |    |
| pygce.analysis.GarminDataFilter . . . . .              | 7  |
| pygce.analysis.StatsAnalysis . . . . .                 | 18 |
| pygce.analysis.ActivitiesDataAnalysis . . . . .        | 5  |
| pygce.analysis.TimelineDataAnalysis . . . . .          | 19 |
| pygce.models.bot.GarminConnectBot . . . . .            | 5  |
| pygce.models.garmin.timeline.GCDaySection . . . . .    | 11 |
| pygce.models.garmin.timeline.GCDayActivities . . . . . | 9  |
| pygce.models.garmin.timeline.GCDayBreakdown . . . . .  | 10 |
| pygce.models.garmin.timeline.GCDaySleep . . . . .      | 12 |
| pygce.models.garmin.timeline.GCDaySteps . . . . .      | 14 |
| pygce.models.garmin.timeline.GCDaySummary . . . . .    | 15 |
| pygce.models.garmin.timeline.GCDayTimeline . . . . .   | 16 |

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

|  |    |
|--|----|
| <a href="#">pygce.analysis.ActivitiesDataAnalysis</a>        | 5  |
| <a href="#">pygce.models.bot.GarminConnectBot</a>            | 5  |
| <a href="#">pygce.analysis.GarminDataFilter</a>              | 7  |
| <a href="#">pygce.models.garmin.timeline.GCDayActivities</a> | 9  |
| <a href="#">pygce.models.garmin.timeline.GCDayBreakdown</a>  | 10 |
| <a href="#">pygce.models.garmin.timeline.GCDaySection</a>    | 11 |
| <a href="#">pygce.models.garmin.timeline.GCDaySleep</a>      | 12 |
| <a href="#">pygce.models.garmin.timeline.GCDaySteps</a>      | 14 |
| <a href="#">pygce.models.garmin.timeline.GCDaySummary</a>    | 15 |
| <a href="#">pygce.models.garmin.timeline.GCDayTimeline</a>   | 16 |
| <a href="#">pygce.analysis.StatsAnalysis</a>                 | 18 |
| <a href="#">pygce.analysis.TimelineDataAnalysis</a>          | 19 |

## Chapter 3

# Class Documentation

### 3.1 `pygce.analysis.ActivitiesDataAnalysis` Class Reference

Inheritance diagram for `pygce.analysis.ActivitiesDataAnalysis`:

### 3.2 `pygce.models.bot.GarminConnectBot` Class Reference

Inheritance diagram for `pygce.models.bot.GarminConnectBot`:

Collaboration diagram for `pygce.models.bot.GarminConnectBot`:

#### Public Member Functions

- `def __init__ (self, user_name, password, chromedriver_path)`
- `def login (self)`
- `def get_user_id (self)`
- `def go_to_dashboard (self)`
- `def go_to_day (self, date_time)`
- `def get_day (self, date_time)`
- `def get_days (self, min_date_time, max_date_time)`
- `def save_json_days (self, min_date_time, max_date_time, output_file)`
- `def save_csv_days (self, min_date_time, max_date_time, output_file)`

#### Public Attributes

- `browser`
- `user_name`
- `user_password`
- `user_logged_in`
- `user_id`

**3.2.3.4** `def pygce.models.bot.GarminConnectBot.go_to_dashboard ( self )`

```
:return: void
    Navigates to user homepage
```

**3.2.3.5** `def pygce.models.bot.GarminConnectBot.go_to_day ( self, date_time )`

```
:param date_time: datetime
    Datetime object with date
:return: void
    Navigates to daily summary of given date
```

**3.2.3.6** `def pygce.models.bot.GarminConnectBot.login ( self )`

```
:return: bool
    True iff correctly logged in
```

**3.2.3.7** `def pygce.models.bot.GarminConnectBot.save_csv_days ( self, min_date_time, max_date_time, output_file )`

```
:param min_date_time: datetime
    Datetime object with date, this is the date when to start downloading data
:param max_date_time: datetime
    Datetime object with date, this is the date when to stop downloading data
:param output_file: str
    Path where to save output to
:return: void
    Retrieves data about days in given range, then saves csv dump
```

**3.2.3.8** `def pygce.models.bot.GarminConnectBot.save_json_days ( self, min_date_time, max_date_time, output_file )`

```
:param min_date_time: datetime
    Datetime object with date, this is the date when to start downloading data
:param max_date_time: datetime
    Datetime object with date, this is the date when to stop downloading data
:param output_file: str
    Path where to save output to
:return: void
    Retrieves data about days in given range, then saves json dump
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/bot.py`

**3.3 pygce.analysis.GarminDataFilter Class Reference**

Inheritance diagram for `pygce.analysis.GarminDataFilter`:

Collaboration diagram for `pygce.analysis.GarminDataFilter`:

## Public Member Functions

- def `__init__` (self, dataset\_file)
- def `parse_csv` (self)

## Static Public Member Functions

- def `convert_time_columns` (headers, headers\_to\_convert, data)
- def `fix_floats` (headers, headers\_to\_fix, data)

## Public Attributes

- `dataset_file`

### 3.3.1 Detailed Description

Parses and fixes raw data

### 3.3.2 Constructor & Destructor Documentation

#### 3.3.2.1 def pygce.analysis.GarminDataFilter.\_\_init\_\_( self, dataset\_file )

```
:param dataset_file: str
    Path to folder with data to analyse
```

### 3.3.3 Member Function Documentation

#### 3.3.3.1 def pygce.analysis.GarminDataFilter.convert\_time\_columns( headers, headers\_to\_convert, data ) [static]

```
:param headers: [] of str
    Column names of data
:param headers_to_convert: [] of str
    Column names of data to convert from time format to float
:param data: [] of []
    Raw data
:return: [] of []
    Input data but with converted time columns
```

#### 3.3.3.2 def pygce.analysis.GarminDataFilter.fix\_floats( headers, headers\_to\_fix, data ) [static]

```
:param headers: [] of str
    Column names of data
:param headers_to_fix: [] of str
    Column names of data to fix the float format
:param data: [] of []
    Raw data
:return: [] of []
    Input data but with fixed floats in columns
```

## 3.3.3.3 def pygce.analysis.GarminDataFilter.parse\_csv ( self )

```
:return: tuple [], [] of []
        Headers of csv file and data
```

The documentation for this class was generated from the following file:

- /home/stefano/Coding/Python/projects/garmin-connect-export/pygce/analysis.py

## 3.4 pygce.models.garmin.timeline.GCDayActivities Class Reference

Inheritance diagram for pygce.models.garmin.timeline.GCDayActivities:

Collaboration diagram for pygce.models.garmin.timeline.GCDayActivities:

## Public Member Functions

- def [\\_\\_init\\_\\_](#) (self, raw\_html)
- def **parse** (self)
- def **to\_dict** (self)
- def **to\_json** (self)
- def [to\\_csv\\_dict](#) (self)
- def [get\\_total\\_kcal](#) (self)
- def [get\\_total\\_duration](#) (self)
- def [get\\_total\\_distance](#) (self)
- def [get\\_totals\\_dict](#) (self)

## Static Public Member Functions

- def [parse\\_activity](#) (raw\_html)

## Public Attributes

- **activities**

## 3.4.1 Detailed Description

Standard activity in the Garmin Connect timeline of day.  
Common features are kcal, time, distance, type, name, link

## 3.4.2 Constructor &amp; Destructor Documentation

## 3.4.2.1 def pygce.models.garmin.timeline.GCDayActivities.\_\_init\_\_ ( self, raw\_html )

```
:param raw_html: str
        HTML source snippet with information about section
```

### 3.4.3 Member Function Documentation

#### 3.4.3.1 `def pygce.models.garmin.timeline.GCDayActivities.get_total_distance ( self )`

```
:return: float
    Total distance of all activities
```

#### 3.4.3.2 `def pygce.models.garmin.timeline.GCDayActivities.get_total_duration ( self )`

```
:return: timedelta
    Total duration of all activities
```

#### 3.4.3.3 `def pygce.models.garmin.timeline.GCDayActivities.get_total_kcal ( self )`

```
:return: float
    Total kcal of all activities
```

#### 3.4.3.4 `def pygce.models.garmin.timeline.GCDayActivities.get_totals_dict ( self )`

```
:return: {}
    Self dict but with totals instead (total kcal, total distance ...)
```

#### 3.4.3.5 `def pygce.models.garmin.timeline.GCDayActivities.parse_activity ( raw_html ) [static]`

```
:param raw_html: str html code
    Raw HTML code of row of table containing activity to parse
:return: dict
    Dict with values of activity
```

#### 3.4.3.6 `def pygce.models.garmin.timeline.GCDayActivities.to_csv_dict ( self )`

```
:return: {}
    Like super.to_csv_dict() but with totals instead
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py`

## 3.5 `pygce.models.garmin.timeline.GCDayBreakdown` Class Reference

Inheritance diagram for `pygce.models.garmin.timeline.GCDayBreakdown`:

Collaboration diagram for `pygce.models.garmin.timeline.GCDayBreakdown`:

## Public Member Functions

- def `__init__` (self, raw\_html)
- def `parse` (self)
- def `to_dict` (self)

## Public Attributes

- `highly_active`
- `active`
- `sedentary`
- `sleeping`

### 3.5.1 Detailed Description

Standard activity in the Garmin Connect timeline of day.  
Common features are highly active %, active %, sedentary %, sleep %

### 3.5.2 Constructor & Destructor Documentation

#### 3.5.2.1 def pygce.models.garmin.timeline.GCDayBreakdown.\_\_init\_\_ ( self, raw\_html )

```
:param raw_html: str
    HTML source snippet with information about section
```

The documentation for this class was generated from the following file:

- /home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py

## 3.6 pygce.models.garmin.timeline.GCDaySection Class Reference

Inheritance diagram for pygce.models.garmin.timeline.GCDaySection:

Collaboration diagram for pygce.models.garmin.timeline.GCDaySection:

## Public Member Functions

- def `__init__` (self, raw\_html, tag='')
- def `parse` (self)
- def `to_dict` (self)
- def `to_json` (self)
- def `to_csv_dict` (self)

## Public Attributes

- `tag`
- `html`
- `soup`

### 3.6.1 Detailed Description

Standard section in the Garmin Connect timeline of day.

### 3.6.2 Constructor & Destructor Documentation

#### 3.6.2.1 `def pygce.models.garmin.timeline.GCDaySection.__init__( self, raw_html, tag = " " )`

```
:param raw_html: str
    HTML source snippet with information about section
:param tag: str
    Unique str in order not to mistake this GCDaySection with another one
```

### 3.6.3 Member Function Documentation

#### 3.6.3.1 `def pygce.models.garmin.timeline.GCDaySection.parse( self )`

```
:return: void
    Parses raw html source and tries to finds all information
```

#### 3.6.3.2 `def pygce.models.garmin.timeline.GCDaySection.to_csv_dict( self )`

```
:return: {}
    Like self.to_json() but with a unique str before each key to spot against different GCDaySections
```

#### 3.6.3.3 `def pygce.models.garmin.timeline.GCDaySection.to_dict( self )`

```
:return: dict
    Dictionary with keys (obj fields) and values (obj values)
```

#### 3.6.3.4 `def pygce.models.garmin.timeline.GCDaySection.to_json( self )`

```
:return: json object
    A json representation of this object
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py`

## 3.7 `pygce.models.garmin.timeline.GCDaySleep` Class Reference

Inheritance diagram for `pygce.models.garmin.timeline.GCDaySleep`:

Collaboration diagram for `pygce.models.garmin.timeline.GCDaySleep`:

## Public Member Functions

- def `__init__` (self, raw\_html)
- def `parse` (self)
- def `parse_sleep_totals` (self)
- def `parse_bed_time` (self)
- def `parse_sleep_times` (self)
- def `to_dict` (self)

## Public Attributes

- `night_sleep_time`
- `nap_time`
- `total_sleep_time`
- `bed_time`
- `wake_time`
- `deep_sleep_time`
- `light_sleep_time`
- `awake_sleep_time`

### 3.7.1 Detailed Description

Standard activity in the Garmin Connect timeline of day.  
Common features are total, deep total, light total, awake total

### 3.7.2 Constructor & Destructor Documentation

#### 3.7.2.1 `def pygce.models.garmin.timeline.GCDaySleep.__init__( self, raw_html )`

```
:param raw_html: str
    HTML source snippet with information about section
```

### 3.7.3 Member Function Documentation

#### 3.7.3.1 `def pygce.models.garmin.timeline.GCDaySleep.parse_bed_time( self )`

```
:return: void
    Finds hour start/end sleep
```

#### 3.7.3.2 `def pygce.models.garmin.timeline.GCDaySleep.parse_sleep_times( self )`

```
:return: void
    Finds deep/light/awake sleep times
```

### 3.7.3.3 def pygce.models.garmin.timeline.GCDaySleep.parse\_sleep\_totals ( self )

```
:return: void
    Finds value of night/nap/total sleep times
```

The documentation for this class was generated from the following file:

- /home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py

## 3.8 pygce.models.garmin.timeline.GCDaySteps Class Reference

Inheritance diagram for pygce.models.garmin.timeline.GCDaySteps:

Collaboration diagram for pygce.models.garmin.timeline.GCDaySteps:

### Public Member Functions

- def [\\_\\_init\\_\\_](#) (self, raw\_html)
- def **parse** (self)
- def [parse\\_steps\\_count](#) (self)
- def [parse\\_steps\\_stats](#) (self)
- def **to\_dict** (self)

### Public Attributes

- **total**
- **goal**
- **avg**
- **distance**

### 3.8.1 Detailed Description

Standard activity in the Garmin Connect timeline of day.  
Common features are total, goal, distance, avg daily

### 3.8.2 Constructor & Destructor Documentation

#### 3.8.2.1 def pygce.models.garmin.timeline.GCDaySteps.\_\_init\_\_ ( self, raw\_html )

```
:param raw_html: str
    HTML source snippet with information about section
```

### 3.8.3 Member Function Documentation

#### 3.8.3.1 def pygce.models.garmin.timeline.GCDaySteps.parse\_steps\_count ( self )

```
:return: void
    Parses HTML source and finds goal and daily steps
```

#### 3.8.3.2 def pygce.models.garmin.timeline.GCDaySteps.parse\_steps\_stats ( self )

```
:return: void
    Parses HTML source and finds daily distance and avg daily steps
```

The documentation for this class was generated from the following file:

- /home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py

## 3.9 pygce.models.garmin.timeline.GCDaySummary Class Reference

Inheritance diagram for pygce.models.garmin.timeline.GCDaySummary:

Collaboration diagram for pygce.models.garmin.timeline.GCDaySummary:

### Public Member Functions

- def `__init__` (self, raw\_html)
- def `parse` (self)
- def `parse_likes` (self)
- def `parse_comment` (self)
- def `parse_kcal_count` (self)
- def `to_dict` (self)

### Public Attributes

- `likes`
- `comment`
- `kcal_count`

#### 3.9.1 Detailed Description

Standard activity in the Garmin Connect timeline of day.  
Common features are likes, comment, kcal

### 3.9.2 Constructor & Destructor Documentation

#### 3.9.2.1 `def pygce.models.garmin.timeline.GCDaySummary.__init__( self, raw_html )`

```
:param raw_html: str
    HTML source snippet with information about section
```

### 3.9.3 Member Function Documentation

#### 3.9.3.1 `def pygce.models.garmin.timeline.GCDaySummary.parse_comment ( self )`

```
:return: void
    Finds comment value and stores value
```

#### 3.9.3.2 `def pygce.models.garmin.timeline.GCDaySummary.parse_kcal_count ( self )`

```
:return: void
    Finds kcal value and stores value
```

#### 3.9.3.3 `def pygce.models.garmin.timeline.GCDaySummary.parse_likes ( self )`

```
:return: void
    Finds likes count and stores value
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py`

## 3.10 `pygce.models.garmin.timeline.GCDayTimeline` Class Reference

Inheritance diagram for `pygce.models.garmin.timeline.GCDayTimeline`:

Collaboration diagram for `pygce.models.garmin.timeline.GCDayTimeline`:

### Public Member Functions

- `def __init__(self, date_time, summary_html, steps_section_html, sleep_section_html, activities_section_html, breakdown_section_html)`
- `def parse(self)`
- `def __getattr__(self, item)`
- `def to_dict(self)`
- `def to_csv_dict(self)`
- `def to_json(self)`

## Public Attributes

- **date**
- **sections**

### 3.10.1 Detailed Description

Standard Garmin Connect timeline of day as in webpage.

Each standard day consists of different sections:

- summary (day, likes, comment, kcal)
- steps (total, goal, distance, avg daily)
- sleep (total, deep total, light total, awake total)
- activities (for each one: kcal, time, distance, type, name, link)
- breakdown (highly active %, active %, sedentary %, sleep %)

### 3.10.2 Constructor & Destructor Documentation

#### 3.10.2.1 `def pygce.models.garmin.timeline.GCDayTimeline.__init__( self, date_time, summary_html, steps_section_html, sleep_section_html, activities_section_html, breakdown_section_html )`

```
:param date_time: datetime
    Datetime of day
:param summary_html: str
    HTML source snippet with information about the day
:param steps_section_html: str
    HTML source snippet with information about daily steps
:param sleep_section_html: str
    HTML source snippet with information about daily sleep
:param activities_section_html: str
    HTML source snippet with information about daily activities
:param breakdown_section_html: str
    HTML source snippet with information about daily breakdown
```

### 3.10.3 Member Function Documentation

#### 3.10.3.1 `def pygce.models.garmin.timeline.GCDayTimeline.parse ( self )`

```
:return: void
    Finds all sections to parse, then builds corresponding objects and parses everything
```

#### 3.10.3.2 `def pygce.models.garmin.timeline.GCDayTimeline.to_csv_dict ( self )`

```
:return: {}
    Like self.to_dict() but with a set with keys and values NOT nested. Also for activities there are totals c
```

#### 3.10.3.3 `def pygce.models.garmin.timeline.GCDayTimeline.to_dict ( self )`

```
:return: dict
    Dictionary with keys (obj fields) and values (obj values)
```

### 3.10.3.4 `def pygce.models.garmin.timeline.GCDayTimeline.to_json ( self )`

```
:return: json object
    A json representation of this object
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/models/garmin/timeline.py`

## 3.11 `pygce.analysis.StatsAnalysis` Class Reference

Inheritance diagram for `pygce.analysis.StatsAnalysis`:

Collaboration diagram for `pygce.analysis.StatsAnalysis`:

### Public Member Functions

- `def __init__ (self, dataset_file)`
- `def show_correlation_matrix (self, title_image, headers_to_analyze)`

### Additional Inherited Members

#### 3.11.1 Detailed Description

Computes correlation of data

#### 3.11.2 Constructor & Destructor Documentation

##### 3.11.2.1 `def pygce.analysis.StatsAnalysis.__init__ ( self, dataset_file )`

```
:param dataset_file: str
    Path to folder with data to analyse
```

#### 3.11.3 Member Function Documentation

##### 3.11.3.1 `def pygce.analysis.StatsAnalysis.show_correlation_matrix ( self, title_image, headers_to_analyze )`

```
:param title_image: str
    Title of output image
:param headers_to_analyze: [] of str
    Compute correlation matrix of only these headers
:return: void
    Shows correlation matrix of data of files in folder
```

The documentation for this class was generated from the following file:

- `/home/stefano/Coding/Python/projects/garmin-connect-export/pygce/analysis.py`

## 3.12 pygce.analysis.TimelineDataAnalysis Class Reference

Inheritance diagram for pygce.analysis.TimelineDataAnalysis:

Collaboration diagram for pygce.analysis.TimelineDataAnalysis:

### Public Member Functions

- def `__init__` (self, dataset\_file)
- def `parse_csv` (self)
- def `show_correlation_matrix_of_data` (self)
- def `predict_feature` (self, feature)
- def `cluster_analyze` (self)

### Static Public Member Functions

- def `show_bar_chart` (title, x\_labels, y\_values, y\_label)

### Static Public Attributes

- list `HEADERS_TO_ANALYZE`
- list `TIME_HEADERS_TO_CONVERT`

### Additional Inherited Members

#### 3.12.1 Detailed Description

Machine-learn timeline data

#### 3.12.2 Constructor & Destructor Documentation

##### 3.12.2.1 def pygce.analysis.TimelineDataAnalysis.\_\_init\_\_ ( self, dataset\_file )

```
:param dataset_file: str
    Path to folder with data to analyse
```

#### 3.12.3 Member Function Documentation

##### 3.12.3.1 def pygce.analysis.TimelineDataAnalysis.cluster\_analyze ( self )

```
:return: void
    Computes cluster analysis: see days based on differences.
    Each day is different from one another, there are days where you trained more, others where you ate more .
    The goal is to divide your days into categories (e.g highly-active, active ...) based on data logs.
```

**3.12.3.2** `def pygce.analysis.TimelineDataAnalysis.parse_csv ( self )`

```
:return: tuple [], [] of []
        Headers of csv file and data
```

**3.12.3.3** `def pygce.analysis.TimelineDataAnalysis.predict_feature ( self, feature )`

```
:param feature: str
        Name of feature (column name) to predict
:return: TODO
        TODO
```

**3.12.3.4** `def pygce.analysis.TimelineDataAnalysis.show_bar_chart ( title, x_labels, y_values, y_label )` [static]

```
:param title: str
        Title of chart
:param x_labels: [] of str
        Names for each variable
:param y_values: [] of float
        Values of x labels
:param y_label: str
        Label of y axis
:return: void
        Show bar chart
```

**3.12.3.5** `def pygce.analysis.TimelineDataAnalysis.show_correlation_matrix_of_data ( self )`

```
:return: void
        Shows correlation matrix of data of files in folder
```

**3.12.4** **Member Data Documentation****3.12.4.1** `list pygce.analysis.TimelineDataAnalysis.HEADERS_TO_ANALYZE` [static]

**Initial value:**

```
1 = [
2     "SUMMARY:kcal_count",
3     "STEPS:distance",
4     "SLEEP:light_sleep_time",
5     "BREAKDOWN:sleeping",
6     "BREAKDOWN:highly_active",
7     "ACTIVITIES:kcal",
8     "BREAKDOWN:active",
9     "STEPS:total",
10    "STEPS:avg",
11    "BREAKDOWN:sedentary",
12    "SLEEP:awake_sleep_time",
